We're now in your area

OHM has been serving clients nationwide for over 15 years from our Findlay, Ohio headquarters and other strategically located response centers. Our new response center in St. Louis will allow us to provide our full range of environmental services even more efficiently to clients in the Mississippi Valley and contiguous states.

We're progressive

OHM provides a complete scope of environmental services to respond to the emergency or remedial action needs of our clients. Our services include:

- Facilities Decontamination
- Hazardous Waste Site Cleanup
- Groundwater Recovery and Treatment
- On-site Treatment Equipment
- Technical Advisory Services
- Laboratory Services
- Biological Treatment
- Surface Impoundment Services
- Explosives/Reactives Handling
- OHM MUST PROGRAM
(Management of Underground Storage Tanks)
- Emergency Response

The OHM approach applies state-of-the-art containment, recovery, treatment and mitigation techniques—ON-SITE, whenever possible. On-site treatment is often more cost effective than transportation and disposal. And destruction of contaminants on-site eliminates all future liability for our clients.

We're Experienced

Since 1969, OHM has successfully completed thousands of projects throughout the U.S. and Canada. We've assisted private sector clients both large and small, as well as local, state and the federal governments. Our experience ranges from emergency response to hazardous materials spills, to groundwater restoration and facilities decontamination, to complete remedial cleanups of major hazardous waste sites. Our engineers, chemists, hydrogeologists, scientists and other skilled technicians have acquired years of invaluable experience in implementing unique techniques for containment, recovery, treatment and mitigation. We can provide our many specialized services individually or we can provide total project responsibility from initial assessment through complete remedial action.

For further information about our unique services, call us anytime day or night.
