OPA 90 Response Readiness Program

Rapid resource deployment.
Reliable service.
Response and remediation experience.

Three features your company needs for compliance with OPA 90 requirements. Features that also happen to be OHM Remediation Services Corp.'s strengths. Keep reading, and find out how OHM can make your OPA 90 compliance job easier, and why OHM is the best-qualified remediation and emergency response contractor in the nation.

Rapid Resource Deployment

Calling 800-537-9540 activates OHM's nationwide system for response to oil and hazardous substance spill emergencies. Within hours following notification, OHM can have equipment, materials, and professional response personnel on your site from its nationwide response facilities.

- Nationwide response network: 22 response centers, 28 total locations for response support and over 60 active remediation sites
- 2,000 personnel, including 1,300 OSHA-trained crew members
- 3,500-piece equipment inventory
- 500 technical professionals
- Program management staff experienced in and dedicated to OPA 90 issues and regulations
- Local site operations oversight
- Prequalified subcontractor network

OHM was one of the first contractors to receive U.S. Coast Guard Oil Spill Removal Organization (USCG OSRO) status, with final classifications issued on August 18, 1993 for:

- River and Canal
- Inland and Nearshore
- Great Lakes

Providing Reliable Environmental Service for 25 Years

Efficient and cost-effective response to product releases -- from facilities and vessels, on water, and on land -- is just one part of OHM's comprehensive and reliable service package. Clients also have access to:

- National Preparedness for Response Exercise Program (PREP) participation
- Site safety plan development
- HAZWOPER, boat handling, mechanical recovery, and boom deployment training
- Long-term remediation
- Response plan development
- Spill response team management
- Equipment inspection
- Equipment fabrication
- Project technical support
- Rapid-turnaround laboratory analysis
- OSHA compliance audits
- Regulatory agency liaison
- Approval to cite OHM as an OSRO in response plans

While the current focus of the OPA 90 regulations is oil spill control, OHM is equally prepared to serve clients when federal regulations for hazardous substances are issued. OHM has been an industry leader in this type of response for many years.
